Heat-Stress Supervisor Guide

Document WHS-HEAT-2026-07

Previous exposure summary: 25 August 2026.

Warning and response sequence

Warning revision HW-2026-07.

Stop work and call emergency services for confusion, collapse, seizure, or loss of consciousness. Move the person to a cooler area and begin active cooling while help is arranged.

Status cues are expressed with text as well as visual emphasis.

North Region guidance

At a WBGT action threshold, apply the North Region work/rest schedule, provide cooled hydration, and document supervisor checks every 30 minutes.

Coastal Region guidance

Account for humidity and radiant loading, use the Coastal Region acclimatization schedule, and move recovery breaks to the cooled area.
